

Gouging tool "GROOVY"

The new "GROOVY" gouging tool is the lightweight, handy tool for the experienced layer of elastic floor coverings made of PVC or linoleum. Its ergonomic shape makes it possible to achieve the desired groove width and depth up to the connecting walls, defined and clean-cut, with little pressure.

- Lightweight and handy
- Groove preparation without milling
- Clean transition from machine-milled groove to the closure
- Ideal for surfaces that are small and difficult to access
- Precise working thanks to roller guide
- Groove gouging up to connecting walls
- Adjustable groove depth
